

# TELESCOPIC GUARDRAIL SYSTEM

The system comprises of steel posts which are fixed to the floor via screws through the base plate. The posts are then connected via telescopic tubes to form a double guard rail. Toeboards can be secured to the base plates if required.

The posts have anti-luce fittings on two adjacent faces meaning they can be used at corners, end of runs or mid-posts.

Highly visible method of forming edge protection by securing posts to the floor and linking with telescopic metal rails.

**Typical L Shape Arrangement**

Example quantities required to form 1no "L" shaped arrangement:

3x no posts

2x Telescopic guardrail – short (0.8m-1.2m)each

2x Telescopic guardrail – standard (1.2m-2m)

**Post and telescopic guard rails only £157 per L shape**

**Typical Stair Arrangement**

## Components:

- Guardrail Post
- Telescopic Rail Short: 0.8 - 1.2m
- Telescopic Rail Medium: 1.2 - 2m
- Telescopic Rail Long: 2.0 - 3.6m
- Stair Stringer Post:
- Newel Box Fitting:
- Newel Plate

**Next Day Delivery**

**Newel Plate**

**Newel Box Fitting**

**Antiluce Detail**
